WE ARE BEYOND REGISTRY, WE ARE

PreciScan®

Presenting our flagship
ANNA
model.

ANNA

Powered by **torensma research consultancy**

It's not just data, we deliver value-based solutions

Data Processing
Exploratory Data Analytics, the most advanced approach.

Consultancy Experts
Data Scientists, Epidemiologists, Professors and Medical Doctors. Our team is in the healthcare field's heart.

FAIR Data Analysis
Deploying all types of analysis, Descriptive, Inferential and Prognostic. While ensuring all data is FAIR.

Evidence-based Practice
Our solutions are based on established and innovative evidence. To provide your patients with the best care.

Λlgorithmic Νetwork for Νurtured Λnalytics

Λlgorithmic — emphasizes the data science framework and systematic methods used.

Νetwork — highlights data manipulation, interconnectivity, and possibly neural networks.

for Νurtured — implies a constant refining process, aligning with the idea of evidence-based practice which uses the best available evidence to inform decisions.

Λnalytics — serves as the culmination of all efforts, ensuring FAIR data and precision scans are central to the process.

WHAT WE DO?

TAKE A STEP INTO THE FUTURE

We are partnering with you to transform **complex** healthcare data into **actionable**, evidence-based insights that can significantly **elevate** patient care.

OUR GOALS

- Increase Reimbursement Value
- Improved Patient Outcomes
- Decrease Costs and Expenses
- Establish Center of Excellence
- Elevate Research Quality
- Upscaling Marketing Potential
